

Appendix B: Team Paper Rubric

Instructions:

What are we looking for?

- Critical thinking and knowledge application.
- Evidence that you've created aspects of care coordination that your group's patient.
- This means it's not an example of best practices that would apply to anyone with these problems. It's the best care plan for your patient.

What is it?

A **written submission** that details a care plan for the patient of your choice. This care plan must include an interprofessional and patient team approach, be founded on verified best practices, and show how it was tailored for this patient.

Paper maximum: three to five pages, double-spaced, not including title page or references.

PAPER FORMAT

Title page: group number, student names, course, date, patient short description. Include the honor code statement. (Title page does not count toward page limit.)

Body of the paper (use headings) See the rubric for details on these sections.

- **Description and setting**
- **Health overview**
- **Care Coordination plan**
- **Evaluation**
- **Issue to address**

References (does not count toward page limit):

Minimum of two scholarly sources as evidence cited for your care plan (peer-reviewed journal or professional publication) and no older than six years. Web sites and consumer sources may be additional, but not in place of scholarly sources.

Appendix (does not count toward the page limit)

This applies to your **in-class team**, not the team that you discussed in the paper. This should be an easy way to gain 15 points for your paper – please don't forget to include this section, and make sure you have all elements.

CARE COORDINATION TEAM PAPER RUBRIC

Criteria	Full Credit	Partial Credit	Minimal Credit	Points Available
Description and setting	Describes client, provides appropriate social and economic background, list of team members. At least one socioeconomic issue identified.	Client identification not appropriate or complete for the diagnosis.	Inappropriate setting, client description incomplete.	10
Health Overview	List of current health issues. Brief description of pathology and treatment for the issues, including medications.	Diagnoses not identified. Excessive amount of description for pathophysiology or treatment.	Issues, pathology incomplete or absent.	15
Care coordination plan	Care coordination plan created based on identified health issues with appropriate citations for best practices. Identifies facilitators and barriers to goals, and personalization of care plan. Identifies resources and team members to include.	Incomplete or inappropriate care coordination plan. Barriers and facilitators not fully identified.	Lacking plan; barriers and facilitators absent.	20
Evaluation	Appropriate description of evaluation plan, using best practices and principles for evaluation. Describes ongoing and summary evaluation.	Evaluation plan not fully supported by literature. Plan not fully described.	Lacking support for evaluation plan.	15

Issue to address	One issue identified to address at the in-person team meeting. Explains how team members will address the issues and ways that roles overlap. Explains how this issue was prioritized and the rationale for that choice.	Issue either too simple or too complex for creating a SMART goal for the in-person meeting. Prioritization and rationale not included. Inadequate description of the team member roles.	Unable to identify the issue to address at the in-person meeting. No description of team member roles.	15
Class Team: Appendix A	Team roles and responsibilities identified. Clear description of communication plan and timeline.	Incomplete description of team, communication, or timeline.	One or more elements missing for team description, communication plan, or timeline.	15
Paper construction and grammar; references	Within page length limit. Appropriate use of APA; at least three scholarly references*. No grammatical errors.	Over or under page requirement. Rare grammatical error. Fewer than three scholarly references.	Over or under length, multiple grammatical errors. No scholarly references.	10
